

EDUCATION

Federal University of Bahia
Bachelors in Computer Science

Salvador, Bahia
Graduation Date: Jul 2026

WORK EXPERIENCE

Segura

Software Engineer

São Paulo, São Paulo
2025 – Present

- Development and evolution of corporate cybersecurity solutions focused on Privileged Access Management (PAM), building secure, scalable and high-performance backend systems using PHP.
- Active participation in the architecture and design of new features, ensuring scalability, security and maintainability across systems.
- Creation and maintenance of APIs integrating internal services, authentication systems, access control and critical security workflows.
- Application of Object-Oriented Programming (OOP), design patterns and software engineering best practices.
- Execution of code reviews, automated testing, refactoring and collaboration through Git workflows and continuous integration pipelines.
- Cross-functional collaboration with multidisciplinary teams, contributing to technical decisions and knowledge sharing.

PicPay

Software Engineer

São Paulo, São Paulo
Oct 2021 – Mar 2024

- Built and optimized Brazil's foremost P2P/P2B lending platform, leveraging expertise in coding and technology to translate vision into a robust and scalable solution, revolutionizing the lending landscape in the country.
- Conducted Unit Testing throughout my participation in the project to ensure the reliability and functionality of the platform, enhancing quality assurance and minimizing risks in production environments, resulting in an impressive 98% code coverage.
- Integrated Kafka as a messaging system to enable real-time data processing and communication between components.
- Utilized Harness for Continuous Integration and Deployment, automating the build and release processes of the platform to accelerate delivery and ensure consistency in software delivery pipelines.

ACP Group

Software Engineer

Salvador, Bahia
Jan 2021 – Oct 2021

- Developed and maintained systems used by the Government of the State of Bahia to manage more than 50,000 institutional accounts.
- Worked on legacy systems using PHP, Angular and Vue.js, performing maintenance, modernization and feature evolution.
- Developed frontend interfaces focused on usability, accessibility and operational efficiency.
- Integrated services based on Microsoft Active Directory and PowerShell automation.
- Participated in technical decisions and continuous architectural improvements.

SKILLS

Backend

- PHP (Laravel, Hyperf)
- Python (Flask)
- Node.js

Architecture & Engineering

- REST APIs
- Microservices
- Systems Integration
- Scalable Architecture
- Code Review
- Automated Testing
- Clean Code

- Design Patterns
- OOP

Databases

- NoSQL
- SQL

DevOps & Tools

- Git
- Docker

- Kafka
- CI/CD
- Harness

Methodologies

- Scrum
- Agile Development
- XP

Frontend

- React
- Vue.js
- Angular
- JavaScript

Languages

- Portuguese (native)
- English (advanced)
- French (basic)
- Spanish (basic)

AWARDS

Desafios Bahia Hackathon - Respeita as Mina

Secured 1st place in a hackathon by conceptualizing and designing a web platform aimed at automating the collection, storage, and analysis of socioeconomic data for women assisted by the police force Ronda Maria da Penha, dedicated to

protecting victims of domestic violence. This initiative contributes to the development of targeted public policies to support this vulnerable population.

Hackathon+ Salvador

Attained 2nd place in a hackathon by crafting and developing a game of riddles leveraging augmented reality to promote user interaction with the historical center of the city of Salvador. This immersive experience facilitated learning about the city's history while engaging users in an interactive and educational adventure.

Desafios Bahia Hackathon - Agricultura Familiar

Achieved 3rd place in a hackathon by designing and developing a Management system for the marketing and delivery of family farming products. This project aimed to streamline processes and enhance efficiency in the distribution of agricultural products, contributing to the growth and sustainability of family farming initiatives.
